

- 1) DFT study of adsorption of the corrosion inhibitor 2-mercaptoimidazole on to Fe(100) surface. Juan Radilla, Guillermo E. Negrón-Silva, Manuel Palomar-Pardavé, Mario Romero-Romo y Marcelo Galván, *Electrochimica Acta*, 112, 577-586 (2013).
- 2) Sensing polarization effects through the analysis of the effective C6 dispersion coefficients in NaCl solutions, Alfredo Guevara-García, Joel Ireta y Marcelo Galván, *J. Chem. Phys.* 142, 014504 (2014).
- 3) Delimiting the boron influence on the adsorptive properties of water and .OH radicals on Hterminated oron Doped Diamond catalysts: A Density Functional Theory analysis, Raciél Jaimes, Jorge Vazquez-Arenas , Ignacio González y Marcelo Galván, *Surf. Sci.*, 663, 27 (2016).
- 4) Nature of Hydrogen Bonds and S···S Interactions in the L-Cystine Crystal, Anaid G. Flores-Huerta, Alexandre Tkatchenko, *Journal of Physical Chemistry A*, 120, 4223-4230 (2016).
- 5) Sensing the active site properties of enzymes as a function of the size of an effective peptidic environment using DFT reactivity parameters, Mayra Lozano-Espinosa, Alfredo Guevara-García y Marcelo Galván, *Theoretical Chemistry Accounts*, 135, 225-238, (2016).
- 6) Theoretical study of the adsorption of substituted guaiacol and catechol radicals on a graphite surface, Luis Ignacio Perea-Ramírez, Rubicelia Vargas, Zaira Domínguez, Magali Salas-Reyes, Myrna H. Matus y Marcelo Galván, *Electrochimica Acta*, 242, 66-72, (2017).
- 7) Theoretical evidence of the relationship established between the HO radicals and H2O adsorptions and the electroactivity of typical catalysts used to oxidize organic compounds, Raciél Jaimes, Jorge Vazquez-Arenas, Ignacio González y Marcelo Galván, *Electrochimica Acta*, 229, 345-351, 2017.
- 8) Using local softness to reveal oxygen participation in redox processes in cathode materials, Luis Ignacio Perea-Ramírez Alfredo Guevara-García Marcelo Galván, *J. Mol. Model.* 24: 227 (2018).
- 9) Experimental and Theoretical Investigation on the Origin of the High Intercalation Voltage of K₂Zn₃[Fe(CN)₆]₂ Cathode, Claudia Islas-Vargas, Alfredo Guevara-García, M. Oliver-Tolentino, G. Ramos-Sánchez, I. González, Marcelo Galván, *Journal of The Electrochemical Society*, 166 (3) A5139-A5145 (2019).
