

8th Meeting on Molecular Simulations:

From simple fluids to chemical reactions.

December 7th to 9th 2016.

Mexico City, November 22th, 2016.

The Selection Committee thanks the scientific community for proposing candidates to be considered for the 'Prize of the 8th Meeting on Molecular Simulations'. After analyzing the information provided by the proponents, the scientific trajectory of the candidates and the general lines defined in the "Convocatoria", the Selection Committee has decided to award the prize to Professor Alejandro Gil-Villegas Montiel from the Physical Engineering Department, Science and Engineering Division-Campus Leon, University of Guanajuato.

Professor Gil-Villegas has made important contributions in the field of theory and molecular simulations and his work has national and international recognition.

The Selection Committee:

Professor Fernando del Río Haza

Professor José Alejandro Ramírez

Professor Gustavo Chapela Castañares
